Proposal	Reason	Benefit
1. AGM proposals to take effect at next Season start. No delay.	The in-build one year/season delay has no obvious reasoning behind it. It deters anyone from coming up with new and relevant ideas and as such is outdated and a negative. It also confuses players as to what can or cannot be changed for the following season when considering any proposals.	Encourages new ideas. Allows the immediate implementation if voted in. Does not affect the running of the league as each idea will still need proposing and voting in at the AGM.
